CHARLOTTE MIDDLE SCHOOL PARTNERS WITH COMMUNITY

Recently, Mrs. Courtney Quinn's Charlotte Middle School 7th grade enrichment Body Systems science class welcomed Dr. Heidi Hansen, local chiropractor. Dr. Hansen visited the class to discuss the skeletal system and the benefits of having a healthy spine. Dr. Hansen, a '96 CHS graduate, jumped at the chance to get back into the classroom when invited by Mrs. Quinn. The students enjoyed her visit and asked a lot of inquiry questions. Michael C. stated, "She brought in a model for a hands on demonstration, told us about why she wanted to become a chiropractor and where she went to college. Dr. Hansen made it feel real." Aiden S. said, "I talked to her about my knees and was glad that I learned about chiropractic care, and she was pretty cool." Mrs. Quinn appreciates the opportunity to bring in community members to help students learn about science careers available to students in this area. Thank you Dr. Hansen! Go Orioles! Oriole Pride!
