CHARLOTTE PUBLIC SCHOOLS ELEMENTARY SCIENCE AND ENGINEERING FAIR

The Charlotte Public Schools elementary science and engineering fair was recently held at Charlotte Upper Elementary. Students from both Parkview Elementary and Washington Elementary displayed their knowledge and understanding of both science and engineering through projects that they completed at home with the help of their parents. The night was a huge success bringing in more than 90 projects to be proudly displayed. The night was full of laughs and conversations as students explained their successes and failures to the more than 300 people that walked through the doors!

In addition to the wonderful display of science and engineering projects, students and parents alike were able to explore many of the STEM stations set up around the room. Everyone enjoyed the Sphero, iRobot, Makey Makey, Kapla Planks, Brackitz, Ozobots, and Little Bits. These science, engineering, and technology tools help us to build future leaders in the STEM fields.

Lastly, the night was capped by awarding more than 50 door prizes thanks to generous donations from Meijer and Tinkrlab. The Parkview and Washington PTOs generously provided the certificates and STEM Fair pins that were awarded to all participants. Thank you to everyone that made this night a huge success and we look forward to many more to come!
