## **CHARLOTTE PUBLIC SCHOOLS HOST INTERACTIVE COMMUNITY NIGHT**

On Wednesday, November 5, Charlotte Public Schools and Discovery Education will host an interactive community night showcasing how educators are using the latest digital media and technologies to enhance classroom instruction district-wide. During this event, attendees will hear from Discovery Education's digital content experts and participate in interactive session demonstrating the Discovery Education Science Techbook™, a complete digital solution that replaces traditional textbooks. The evening will conclude with several engaging hands-on science demonstrations that will challenge students to make predictions, observations and explain what they learn.

Attendees will have the opportunity to experience a model lesson using the Science Techbook, and also explore the dynamic multimedia content in the digital textbook for themselves. Together, these activities will provide all participants a unique opportunity to experience the digital resources that are empowering educators, inspiring and engaging students, and accelerating achievement.

Charlotte Public Schools students currently use both Discover Education Science Techbook and Discovery Education Streaming, a comprehensive digital library of over 100,000 learning objects aligned to state and national standards. Since 2008, Charlotte Public Schools and Discovery Education have partnered to bring digital resources to classrooms to empower teachers, enhance curriculum and inspire students.

Discovery Education is the leading provider of digital content for the classroom and a division of Discovery Communications, whose networks include Discovery Channel, Animal Planet, and Science Channel.

We invite students, parents, community members, teachers, and administrators to this interactive event on Wednesday, November 5, from 6:00 p.m. to 7:30 p.m. at the Charlotte Middle School, 1068 Carlisle Highway.
