CPS STUDENTS EXPLORE FIRE SCIENCE

On March 26, 2019, fifteen Charlotte High School students, along with other area students, attended a Fire Science Exploration Day put on by the Eaton RESA Career Preparation Center and the Charlotte, Grand Ledge and Delta fire departments. These students spent the day touring our local fire departments, talked to and asked questions of the local fire chiefs, learned about the profession and its demands, job outlook and benefits. They ended the day at the Eaton Career Preparation Center, located at LCCs West Campus in Lansing, where they were given a tour of the classroom, facilities, and burn training grounds. They learned how they could enroll in the Eaton RESA Fire Science Program as juniors and seniors in high school. Thank you for all of our partners for making opportunities this possible for CPS students!
